EXAMINER'S AMENDMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Response to Amendment

The amendment filed on 1/16/04 has been entered. Claims 41, 42, 45 and 47 have been amended. Claims 41, 42 and 45-48 are pending.

Applicant's arguments filed on 1/16/04 have been carefully considered and found persuasive in light of the corresponding amendment. In particular, the Applicant argues on page 8 that the cited prior art of record do not teach a laser in which the "gas can be alternately supplied in different directions in the gas supply structure in which first and second ports are symmetrically arranged with respect to the throat center". Although the cited prior art may suggest a symmetric convergent-divergent nozzle (*Ando* Figure 1), there is no teaching that the gas may be directed through said nozzle in either direction. This is not an obvious modification because a laser assembly is not automatically configured to function with a reverse gas flow.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following amendments correct a spelling error only.

The application has been amended as follows:

Claim 41 line 11: change "speed of second" to -- speed of sound --.

Claim 42 line 11: change "speed of second" to -- speed of sound --.

Claim 45 line 15: change "speed of second" to -- speed of sound --.

Art Unit: 2878

Claim 47 line 16: change "speed of second" to -- speed of sound --.

Allowable Subject Matter

Claims 41, 42 and 45-48 are allowed.

The following is an examiner's statement of reasons for allowance: the cited prior art of record does not teach or fairly suggest an exposure apparatus comprising, along with the other claimed features, a first port serving as a first fluid inlet and a second fluid outlet, a second port serving as a second fluid inlet and a first fluid outlet, and a gas supplier capable of supplying a laser gas into the gas supply structure in two directions such that a flow speed of the laser gas supplied in either of said two directions is less than a speed of sound at the throat portion.

The advantages of these features are in the specification on pages 1-14.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davienne Monbleau whose telephone number is 571-272-1945. The examiner can normally be reached on Mon-Fri 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Porta can be reached on 571-272-2444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
